

**Certificate of Compliance**  
**to RoHS and WEEE Directives EC 2002/95/EC, 2002/96/EC**  
**RoHS2 Directive 2011/65/EU, Amendment 2015/863**  
**and**  
**Comment on RoHS3 Compliance**

**PRODUCT: All Products**

**PART NUMBERS: All Part Numbers**

This letter certifies that these products manufactured by Chemtronics® are compliant with the RoHS as currently in force under Amendment 2015/863.

Under the RoHS directives, the following materials are restricted:

- Lead (>1000 ppm)
- Mercury (>1000 ppm)
- Cadmium (>100 ppm)
- Hexavalent Chromium (>1000 ppm)
- Polybrominated biphenyl (PBB) (>1000 ppm)
- Polybrominated diphenyl ether (PBDE) (>1000 ppm)
- Bis(2-Ethylhexyl) phthalate (DEHP): (>1000 ppm)
- Benzyl butyl phthalate (BBP): (>1000 ppm)
- Dibutyl phthalate (DBP): (> 1000 ppm)
- Diisobutyl phthalate (DIBP): (>1000 ppm)

Please note that our products were compliant to current RoHS directives at the time of original production; therefore, no new manufacturing part numbers have been assigned. Substances prohibited under current RoHS directives have never been used in Chemtronics® products and there exists no economic or performance reason to begin adding them.

The 'RoHS3' update is expected to be in force in 2023. Seven additional substances are under consideration and inclusion on the 'RoHS3' restricted substances list.

- Beryllium and Beryllium Compounds
- Cobalt Dichloride and Cobalt Sulphate
- Diantimony Trioxide
- Indium Phosphide
- Medium Chain Chlorinated Paraffins (MCCP)
- Nickel Sulphate and Nickel Sulfamate
- Tetrabromobisphenol A (TBBP-A)

None of these 7 substances are present in Chemtronics® products, so compliance is expected when the 'RoHS3' comes into force. At that time, the compliance will be reviewed and a new statement and certificate of compliance will be released.
